

Plant an App

Capability Statement

5C8
COMPLIANT

UEI: FT4MXA1RBQJ3

CAGE: 8N4X0

NAICS: 513210, 541511

Security Aligned to Federal Standards

About us

Plant an App is a low-code application platform that helps agencies and federal contractors deliver secure mission-support applications, workflow systems, portals, dashboards, and database-backed tools without turning every requirement into a custom code project or another disconnected COTS product.

Founded in 2019 after being selected as a 500 Startups company, Plant an App bridges the gap between governance and delivery speed.

Core Competencies

- Secure Portals & Internal Applications
- Mission Support Applications
- Workflow Automation & Case Management
- Data, Dashboards & Integration Engine
- Legacy Application Modernization
- Deploy in Controlled Environments
- Rapid Application Development
- Predictable and Transparent Pricing

Past Performance

U.S. NAVY

Training & Compliance Systems supporting (Naval Ordnance Safety & Security

GOVERNMENT OF BERMUDA

Transformed Citizen Digital Services across agencies - forms, case management, automation, reporting.

Government of Romania

Digitization across 10+ agencies, including judiciary, environmental, consumer protection, and maritime authorities.

Romanian Postal Services
End-to-end postal operations (4M+ transactions /mo)

"With Plant an App's help, right now we are 2 years ahead on our plan to build an Open Data Government."

– David Wellman, Director Portals, Govt. of Bermuda

Differentiators

- Transforms application backlogs into governed, repeatable delivery pipelines
- Modernizes legacy systems without big-bang rewrites or throwaway tools
- Gives primes a clear differentiation beyond staffing-only proposals
- Creates reusable delivery patterns across contracts and agencies
- Complements prime teams without replacing their developers
- Our Product and Services teams are hands-on alongside the prime and other subs
